Art Unit: 2154

Restriction:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-20 and 30-33, drawn to drawn to user interface for enabling data transferring, classified in class 719, subclass 329 and class 345, subclass 736.

II. Claims 21-29 and 34-36, drawn to data streaming, classified in class 709, subclass 231.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations usable together. The subcombinations are distinct from each other if they are shown to be separately usable together. In the instant case, the invention I has a separate utility such as determining rendering requirements and plotting a consumption graph on a display. The invention II has a separate utility such as determining buffer time based upon a transmission rate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2154

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (see 37 CFR 1.143).25
